Doctor's Choice is the new bank from Joint Doctor, the Canadian breeder and creator of the world famous variety Lowryder, responsible for starting the now hugely popular autoflowering cannabis scene. After creating the Lowryder, this breeder has developed the fastest, most compact and productive autoflowering genetics possible, maximising their best characteristics. The masterpiece of this work is represented by the range of varieties in the Doctor's Choice catalogue, premium high quality genetics, designed to satisfy the most demanding lovers of autoflowers, combining great cannabis classics with newer lines.

Through Doctor's Choice, Joint Doctor offers premium seeds selected for high yields, stability and superior taste.

“Welcome to Doctor's Choice!”

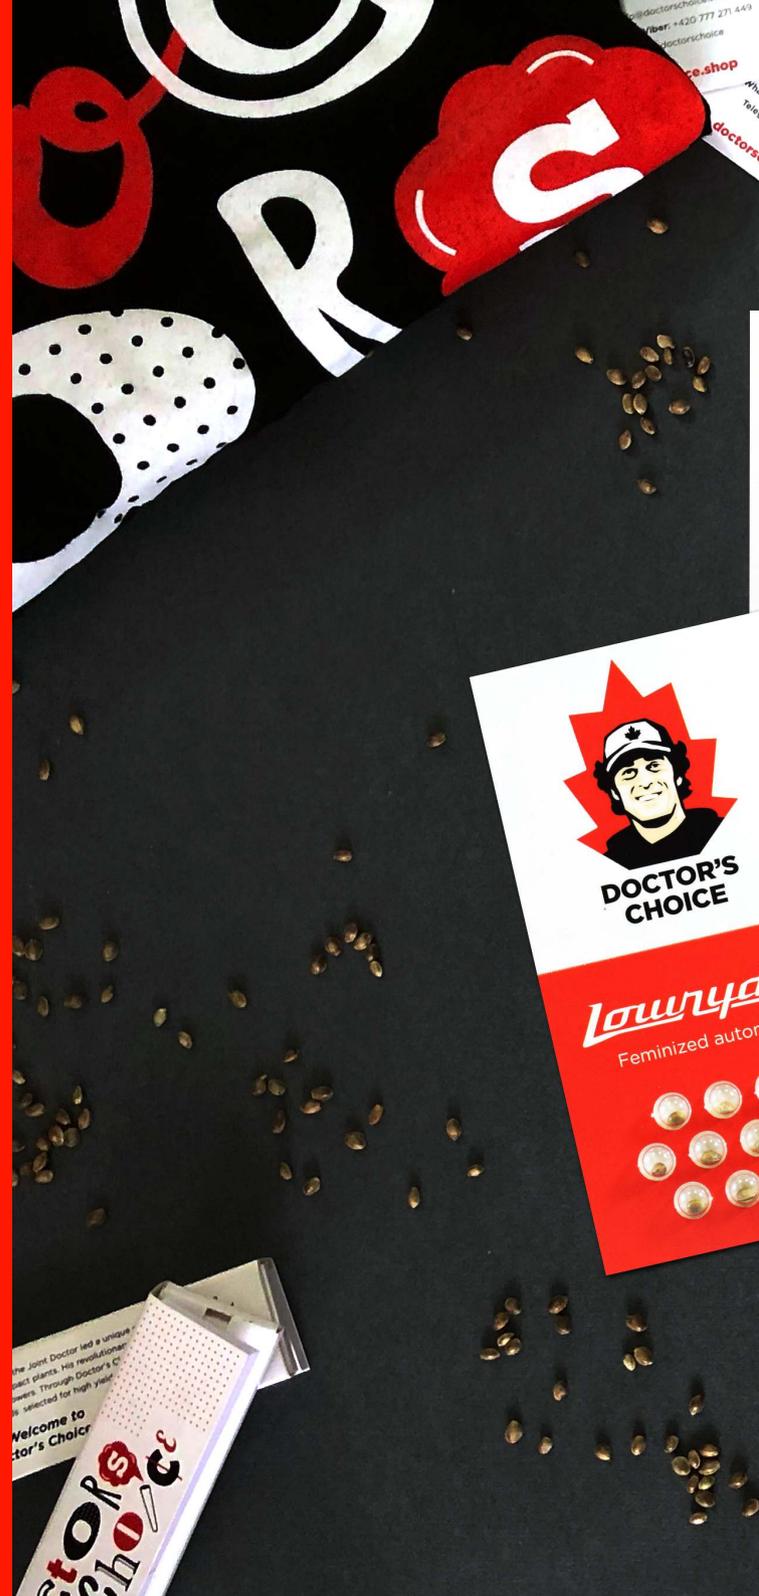

A handwritten signature in black ink, appearing to read 'Sasha', with a stylized, flowing script.

Chronic Ryder auto fem

Legend

The root idea for the strain name was Father's Choice to show respect to his father, when he was testing his strain on father's farm. Finally strain got the name Chronic Ryder — the autoflowering version of famous Chronic by Serious Seeds. Crossing with the Lowryder gave the opportunity to get stable and fast flowering hybrid.

Growing

Compact and fast flowering variety grows well indoors and outdoors. Small height of max 60 cm allows to grow nice and fragrant bushes for 65 days from germination. Despite its compact size the plants develop lots of sticky and big buds with pretty apricot smell. The aroma is hardly noticed at first but it becoming stronger with the harvest approaching.

Short growing period is another strong point of the strain. That's why this is the good choice for countries with short summer - despite the bad weather you'll get your guaranteed yield.

Taste and effect

Chronic Ryder is all about the taste — fruity and citrus tones complement one another, giving unforgettable aftertaste. The effect is mild and doesn't hit you like a hammer — perfect choice for novice smokers. Thanks to balanced high and stone effects Chronic Ryder is a good daytime smoke that stimulates you for a long time.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Hybrid

Genetics: Chronic × Lowryder

THC: High

Finish time: 65 days from seed

Taste: Citrus tones with apricot aftertaste

Effect: Balanced high and stone

INDOOR

Height: 30-60 cm

Yield: 400 g/m²

OUTDOOR

Height: 60 cm

Yield: 30-60 g/plant

Doctor's choice #1 auto fem

Legend

The Doctor's Choice #1 auto fem was the first strain that gave a birth to a new chapter of Sasha Joint Doctor. Sativa dominant plant is based on several legendary geneticists of Jack Herer x Skunk x Lowryder. This background gives the Doctor's Choice #1 strong immunity, unpretentious temper and high yields.

Growing

DC #1 is suitable for indoors and outdoors. It's really easy-to-grow strain that steals a way to hearts of less experienced growers. For better results we recommend to use 600W LED light and plant your babies into 10-15 L pots. Many growers use different trainings for plants to maximise the yield, but we strongly recommend to leave the plant without trainings to get your harvest on time.

Being a Sativa dominant plant growing period is increased and lasts for 70-90 days from germination. Therefore DC #1 will be thankful for your patience. It is one of the potent and high-yield autoflowering strain in our line.

Sativa lovers who have no chances for growing outdoors will appreciate the immunity of the strain. It was specially bred for countries with short and cold summer.

Taste and effect

Most plants have a sweet flavour with light citrus hints thanks to it's parents. The effect of Doctor's Choice #1 is balanced with the strong uplifting high at first, you feel a doze of inspiration that sativa brings to you. After a while your body fills with pleasant relaxation. Also some smokers notice a strong aphrodisiac effect. Feel the full range of pleasures with Doctor's choice #1.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Sativa

Genetics: Jack Herer x Skunk x Lowryder

THC: High

Finish time: 70-90 days from seed

Taste: Sweet flavour with bright citrus nuances

Effect: Uplifting high, strong and endless laugh

INDOOR

Height: 70-150 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 100-150 cm

Yield: 100-250 g/plant

Devotchka auto fem BESTSELLER

Legend

In the novel by Anthony Burgess «A Clockwork Orange» teenagers speak using Nadsat, a false language based on Russian words. Devotchka is Nadsat (and Russian) for "girl". Joint Doctor has long-term relationships with Russia so the name of the strain appeared easily.

The strain, whose parents were AK-47 (another Russian legend), along with Haze and the original Lowryder, was named Devotchka as a salute to Mother Russia. We can say with confidence that now Devotchka is the flagman strain and has won so many hearts of growers all over the world. Strong effects, rich in THC, pleasant taste and ease-to-grow characteristics — Devotchka has it all!

Growing

Sativa genes dominate in the strain: Devotchka can grow in a huge plant, reaching 70-100 cm indoors, and up to 150 cm outdoors, developing lots of long-side branches. For 70 days of rapid growth she produces lots of buds, covered with resin — that's a real challenge to manicure this baby. All the space is filled with sweet berries smell that drives you crazy.

If you're looking for a strong strain that will resist all your growing experiments — Devotchka is what you have to try. She is good start for beginners and experienced growers too — everyone can get guaranteed results.

Taste and effect

Treat yourself with sweet mix of tastes that brings Devotchka to you. Once you've tried forest berries and exotic fruits together you won't like to taste anything else. High level of THC provides a long-term inspiring effect and strong high. Cannabis connoisseurs will enjoy the cerebral stimulation and heavy physical creeping high.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Sativa

Genetics: AK-47 × Lowryder × Haze

THC: Very high

Finish time: 70 days from seed

Taste: Sweet, blackberry fragrance with light hint of wild cherry

Effect: Sativa High with feeling of happiness and boost of energy

INDOOR

Height: 70-100 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 70-150 cm

Yield: 150 g/plant

Niagara auto fem

Legend

Being inspired with the beauty of Niagara Falls, that can be literally translated as “Thundering water” we even couldn’t hesitate how to name another beautiful Doctor’s Choice strain — Niagara auto fem. Huge and very potent buds take you down just like wild water flow thanks to strong genetics of White Widow and legendary Lowryder.

Growing

Niagara is Indica-dominant and joking apart, the most potent plant. Give her a lot of space, plant in spacious pots and she grows like a real monster, reaching up to 150 cm. In some cases she needs to support heavy buds so don’t afraid to tie and stretch it.

The variety is incredibly voracious, a true heavy-eater, be ready to use lots of fertilizers but the result is incredible for auto flower — 150+ gr outdoors and 600 g/m² indoors.

If you’re looking for outdoorless strain then you have to try Niagara — its would be an excellent choice for stealth growing. Be ready to harvest gorgeos and sticky buds after 70-90 days from germination.

Taste and effect

Niagara gives a real enjoyment to weed lovers who appreciate the taste of the strain. The palate reminds nutmeg, earthy hues, with slight berry and sweet notes. High THC level provides strong Indica stone. Even if you are an experienced smoker, be careful with this girl. She is like a tsunami that pull you off the feet and for a long time chains the body to the sofa.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Indica

Genetics: White Widow × Lowryder

THC: Very high

Finish time: 70-90 days from seed

Taste: Nutmeg, earthy hues, with slight berry and sweet notes

Effect: Knock-out Indica stone

INDOOR

Height: 100-150 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 150+ cm

Yield: 100-250 g/plant

Ogre auto fem

Legend

Doctor's Choice Ogre autofem is the result of collaboration between Sasha Joint Doctor and his friends from the Secret Garden seeds. The use of the strong genetics of Secret Citrus Auto, Durban Skunk and Critical allowed to produce high-THC sativa dominant strain. It's popular for euphoric effects and ability to boost your creativity.

Growing

Ogre can be successfully grown both indoor and outdoor. Due to extended built-in veg period plants grow vigorous, showing sex between 17-21 days after germination. The height exceeds 100+ cm, making an auto-flowering variety a real monster that grows twice in size easily. After 10 weeks of growth be ready to harvest sticky buds bombs drowned in resin.

Ogre is famous for its strong immunity, making it a perfect choice for outdoor grow. The plants don't afraid attacks of spider mites and other parasites, also show good resistance to all weather conditions.

Taste and effect

Ogre produces extremely potent smoke with sweet and citrus pine hints. The aroma is so pleasant that you can't keep out of smoking. The high is rapid, strong and powerful, giving a good body relaxation after. Ogre is a perfect daytime smoke that will give you the boost of energy and happiness.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Sativa (60%)

Genetics: Secret Citrus Auto × Durban Skunk

THC: High

Finish time: 70 days from seed

Taste: Citrus notes with distinct earthy nuances

Effect: Balanced high and stone

INDOOR

Height: 75-100 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 75-110 cm

Yield: 60-80 g/plant

Rock Machine auto fem

Legend

This strain is named after Rock Machine M.C., an outlaw motorcycle club founded in Montreal (Joint Doctor's home town). Rock Machine were participants in the infamous Quebec Biker war, and were involved in various criminal activities and plenty of scandals. The gang was formed in 1986 and competed with the Hells Angels for the street-level drug trade in Montreal between 1994 and 2002, resulting in over 160 casualties. The buds of the Rock Machine strain are hard as a stone and will rock you to the core.

Growing

Reliable genetics base of Afghani, Northern Lights and Lowryder allowed to create Indica-dominant and homogenous plant with average height about meter. This easy-to-grow strain can be harvested in 70-80 days after germination, showing great results both indoors and outdoors.

Rock machine really looks nice, giving you a large harvest of resinous, compact buds. They glitter in the sun and emit the pleasant aroma of a classic hash.

Taste and effect

The classic taste of Rock Machine is a mix of earthy, herbal and old school Afghani hash. High THC level provides with mild Indica stone, bringing calmness and relaxation. After hardworking day this strain is what the Doctor recommends!

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Indica

Genetics: Afghani × Northern Lights ×
Lowryder

THC: Very high

Finish time: 70-80 days from seed

Taste: Afghani hash, earthy, herbal blend

Effect: Uplifting high, stronger sense
and endless laugh

INDOOR

Height: 80-120 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 90-150 cm

Yield: 100-150 g/plant

DC Kush fem

Legend

As Afgani is so famous for its power, Doctor's Choice breeders crossed the best selected Afgani and famous Californian O.G. Kush. We are excited to bring the first non-autoflower strain in the Doctor's Choice line — DC Kush, a feminized royal Indica, a unique combination of powerful effect, strong aroma, and a true Kush flavor.

Growing

DC Kush grows like typical Indica plant — compact and bushy, with deep green leaves and perfect calyx to leaf ratio. The plant produces dense, ball-shape buds providing intense diesel aroma with the tints of hash and puer. Filters are recommended for indoor growing because of strong smell.

Suitable for growing indoors and outdoors. Indoors plant needs 8-9 weeks of blooming, giving yield up to 300-400 g/m². Outdoors flowering period finishes by the end of September / beginning of October, ready to give stable yields of 300-400 grams per plant. The average height is 1-2 m tall. If the temperature drops at night the whole plant shows nice purple undertones.

Taste and effect

The strong effect of DC Kush is more physical, giving powerful, long-lasting relaxation to your body, the effect is compared to tranquilliser, even heavy smokers point it out. The buzz is rapid and fast. DC Kush is good for therapeutic use, if you deal with pain, insomnia or have problems with appetite.

Powerful DC Kush is an ideal choice for growers, who truly value a deep stone effect and boundless pleasure.

Autoflowering: No

Gender: Feminized Photoperiod

Room: Indoor, Outdoor

Type: Mostly Indica

Genetics: O.G. Kush × Afghani

THC: Very very high

Taste: Strong body stone

Effect: Classic Kush

INDOOR

Flowering time: 8-9 weeks

Height: 100 cm

Yield: 400-600 g/m²

OUTDOOR

Flowering time: late September /
early October

Height: 100-200 cm

Yield: 300-400 g/plant

Purple Ryder auto fem

Legend

Many old school growers remember all the beauty and power of this purple classics strain from Sasha Joint Doctor. For several years, Doc and his team have been refining the good old Purple Ryder. Several generations of careful selection allowed us now to bring this variety back.

Growing

To create this beautiful lady we use the genetics of Lowryder, Mazar and Red Chronic Ryder. It grows not tall, 60-80 cm, that's typical for Indica plants. These compact plants produce large purple nuggets covered in a sticky layer of resin, but leaves remain brightly green — a real beauty.

Purple Ryder is low-odour strain, you can try micro or stealth grow in your box so that nobody will understand that you're growing weed. The harvest time ends after 10 weeks from germination giving the result of 100 g per plant in optimal conditions.

Taste and effect

Purple Ryder is not only beautiful plant but also have pleasant taste — it combines fresh floral side with a hint of sweetness. Indica hits your body with mild and smooth stone, gives total relaxation. If you want to have a rest after stressful day — it's time to give your preference to Purple Ryder.

Autoflowering: Yes

Gender: Feminized Autoflowering

Room: Indoor, Outdoor

Type: Mostly Indica

Genetics: Lowryder × Mazar ×
Red Chronic Ryder

THC: High

Finish time: 70 days from seed

Taste: Floral side with a hint of sweetness

Effect: Uplifting high, stronger sense
and endless laugh

INDOOR

Height: 60-80 cm

Yield: 400-600 g/m²

OUTDOOR

Height: 80-100 cm

Yield: 100 g/plant

Genotype: Hybrid

Genetics: Chronic Ryder x CBD rich plant

Gender: Feminised Autoflowering

Type: For medical use

THC:CBD Ratio: 1:1

THC: 6%

CBD: 6%

Aroma: Citrus, spicy, earthy

INDOOR

Height: 50-120 cm

Yield: 50 gr/plant

Finish time: 60-70 days from seed

OUTDOOR

Height: 100+ cm

Yield: 50 gr/plant

Finish time: 70 days from seed

DC Cure 1:1 auto fem **NEW**

Legend

DC Cure 1:1 is Doctor's Choice's first auto-flowering medical strain. We have specially bred this strain with the optimal ratio of THC to CBD 1:1, which has all the qualities of medical cannabis. This variety gives a pleasant boom of energy, helps to fight with anxiety and pressure. In a word — what the Doctor ordered!

Growing

DC Cure 1:1 performs well in various conditions. Even a newbie who will grow for the first time can easily handle this baby. The variety requires minimal care, love, and gives a guaranteed yield. DC Cure goes well with any training method; strain will show the best results with the SCROG technique. During flowering, it forms dense, sticky buds with citrus aroma and notes of spices. The key characteristic of this variety is speed – she can be easily done on average 60-70 days from the seed. The yield is usually about 50 grams per plant, but it fully compensated by the top quality of buds.

Do not forget that you will grow such medical varieties only for yourself or for your loved ones, so it is better to fertilize with organic nutrients. Also, be sure to flush your plants with pure water before harvest, it will help to make your buds truly medical!

Taste and effect

DC Cure 1:1 has a wide range of medical uses. She could provide a good treatment in the most popular cases like appetite enhancement, relaxation, anti-inflammatory, pain relief and chronic diseases. The variety has a quick but smooth effect on the smoker without causing anxiety or paranoia, thanks to the balanced ratio of THC and CBD. The impact occurs both on the body and on the mind, causing relaxation and tranquillity.

The aroma of medical DC Cure is dominated by citrus fruits, with light hints of spices.

Genotype: Mainly Indica

Genetics: North American Indica x
Hashplant Indica x Wild Landrace

Type: Super Auto

Gender: Feminized Autoflowering

Aroma: Hash, earthy

Effect: Body stoned

THC: Extremely High

OUTDOOR

Height: 250+ cm

Yield: 200-300 gr/plant

Finish time: 115-135 days from seed

INDOOR

Height: 100+ cm

Yield: 200 gr

Finish time: 100-120 days from seed

Deepforest Super Auto NEW

Legend

Just imagine: you're working your way up the wildwoods like a fun-seeker. In a forest full of magic, surrounded by the mystic spirits and breathtaking nature... you finally reach this secret spot... the witching forest meadow! Loud sounds of Deep Forest band merge with the atmosphere of the dark deep forest — just what the Doctor ordered! Forest, music, wild plants — everything here is so miraculous.

Growing

The Super Auto line is the next step in the evolution of auto-flowering cannabis. The auto-feminized version is comparable to other photoperiod varieties in yield and flavour. The only difference is that the Super Auto starts to flower automatically and allowing you to get a high-quality crop a little faster, in 4 months.

The genetics of Deepforest is a cross of the best and reliable strains that have given all the best of their qualities to the strain — **Hashplant Indica** (fast-flower, yield and aroma), **Wild Landrace** (strong immunity, abundant growth and flavouring properties) and pure **North American Indica**. Finally you get a strong, vigour and tasty strain with Indica dominance for growers with all level skills.

The lifetime circle of the plant lasts 4 months on average. It flowers automatically after 1,5 month of active growth, building up extensive weight of the plant and forms fragrant and large buds. The buds are fully drowned in resin during the remaining period, not depending on daylight hours.

Deepforest Super Auto is primarily a variety for wild outdoor cultivation due to it's unpretentious and strong immunity. This strain is a really heavy eater, be ready to supply her with abundant feeding that will result in 2 m monster plant. Growing indoors be ready to be as patient as possible, but if you ready to face this challenge we recommend using large spacious pots, 10L or more. Its better to support the plant during the active growth just not to break heavy branches.

Taste and effect

Thanks to its parents Deepforest has a rich classic taste and intense hash aroma that will place your mind to the streets of Amsterdam. Indica dominance provides a strong and long-lasting sedative effect on the body, effects both on body and mind — an unforgettable experience!

A close-up photograph of a cannabis flower, showing the intricate structure of the trichomes and bracts. The lighting is warm and golden, highlighting the fine hairs and the texture of the plant. The background is blurred, showing more of the plant's foliage.

Lowryden

Autoflowering: Yes
Gender: Feminized / Regular Autoflower
Room: Indoor, Outdoor
Type: Hybrid
Genetics: Santa Maria × Lowryder
THC: Medium
Finish time: 65 days from seed
Taste: Exotic, sweet, berry
Effect: Balanced high and stone

INDOOR & OUTDOOR

Height: 30-60 cm
Yield: 25-60 g/plant

Lowryder **ICON**

Legend

We hope that everyone knows the true legend — Lowryder. With this strain began a long story of Sasha Joint Doctor — he was the first who made revolution in breeding, and started the age of Autoflowers.

Lowryder #2 is a successor to the Joint Doctors flagship Lowryder. The strain has been infused with superior Santa Maria genetics, a variety known for copious resin production, exotic taste and soaring highs, it is an indica/sativa hybrid originally from Brazil.

From the last time we decided that true legend doesn't need any numbers, so from here to eternity the strain will be named as Lowryder! We're proud to announce that variety is available in regular and feminized forms. In 2010 Lowryder #2 was included in TOP-10 Canadian Strains by High Times Magazine.

Growing

Lowryder has improved characteristics of strength, yield and flavour that made it so popular. That's stable and compact strain performs well indoors and outdoors. It's ideal variety for growers who are lack in spacious rooms and need the result as quick as possible.

For 9 weeks it produces large and dense buds that are more aromatic than the original Lowryder with bitter-sweet smell. As with original Lowryder, there is no need in separate room or special light cycle. Outdoors, Lowryder will mature quicker than any non-auto-flowering variety.

Taste and effect

Lowryder has pleasant bitter-sweet taste with spicy notes. The effect is balanced with light dominance of Indica body stone which provides you with mild calming feeling.

You can create your own autoflowering strain — easily!

One of the simplest and quickest ways to create your own autoflowering strain, is by crossing your favorite female plant from a non-autoflowering strain or landrace, with a male from a pure autoflowering strain such as Lowryder.
